

This is a very short report but the information contained in here could have a big impact on how you promote your sites and how you make money online.

Introduction

In the process of researching my new e-book I came across something that could revolutionise the way you use your blog or distribute your articles.

Everyone knows that you should regularly update your blog with unique content. There is now a method that will allow you to add unique content to your blog that is of a high quality and has been written by humans and is not the product of a synonymising tool.

There are 2 Parts to this report, the first is for people who do article marketing and it shows you how you can get thousands of unique articles distributed all with a link and different anchor text linking back to your site. This is pretty straight forward but the magic comes when people start to use the second part of the report. Part II will show blog owners how they can earn money and really boost the effect of publishers articles.

The second Part of the report deals with how you can get unique content posted to your Wordpress Blogs on a daily basis. Obviously both parts are linked the more people who get the unique articles posted to their blogs the more blogs are available for Publishers.

Why unique content?

A debate has raged for a long time about whether Google has a duplicate content penalty. Personally I think they probably do but even if they don't then surely having unique content on your site has to be better than having the same content as everyone else.

How Can I Create unique content ?

There are 3 standard methods of making your articles unique. I'll list them here in reverse order of effectiveness.

Method 1 is to change the opening paragraph of the articles along with the last paragraph. You should then make a few changes to one or 2 other paragraphs. This makes each article a little bit unique.

Method 2 is to use a synonym replacement tool to change various words so that they are different but mean the same. This takes practice but can be effective. Personally I don't like this method as the articles seldom look like they have been written by humans. Wordflood is a good tool for this method.

Method 3 is my personal favorite and one that I've been using for a while now with excellent results. I use a tool called [Unique Article Wizard](#) which will create thousands of unique articles which it then distributes to hundreds of article sites. The number of links back then starts to build over the following weeks. It takes about 1 hour to one and a half hours to get an article set up for distribution but the articles look exactly like they were written by a human....because they are. To ensure quality They have to pass human review by the staff at UAW before they are distributed.

The amount of links you get back can increase dramatically some of my articles have gone from being

indexed on various sites 85 times in week 2 to over 440 times by week 3.

This is about to change dramatically for the better as you will see in the second Part of this report.

I must emphasize that this is not quick fix, you will need to do some work to each article before posting but UAW has a really good step by step wizard. It takes me about an hour to get an article ready but I've seen my wife write an article and get it set up for distribution in under 45 minutes.

There is a cost involved but personally I believe that it's cheap given the results I've had. This includes increased affiliate sales and an jump in Adsense earnings on sites I've targeted. To find out more about how to get unique articles distributed to hundreds of sites please [click here](#)

Part II. Unique Content for Blogs.

(Let me say this first... This is completely FREE. You could spend \$8 on a domain name now and within 15 minutes you could be receiving free unique content.)

If you own a wordpress blog you will know that the more frequently you add content the better your blog performs. The best kind of content to add is Unique content. If you read Section 1 you will know that [UAW](#) distributes Unique content on a daily basis (not Sundays). When they first started they used to only distribute to Article dashboard sites but that has now changed. If you own a Wordpress blog you can have unique content sent to your blog.

To get the content it's a simple as installing a plugin selecting the categories and receiving a test post. All the content is checked before being sent out. You can then set up your blog with Affiliate products, Adsense or any other type of monetization you can think of and leave it to earn on auto-pilot. (Obviously the more promotion you do the better)

The potential for your site is immense. I am sure I really don't need to highlight what this could mean to your blog.

There are also plugins for [Blogger blogs](#) and I believe that a plugin for Joomla sites is on the way.

To get your **FREE** plugin go to <http://www.uniquearticlewizard.com/wordpress.html>

If you read this and thought "I wish I knew about this sooner" or are interested in various ways of making money online. Then why not check out what our [Membership Site](#) offers. The members were told about this method several weeks ago. At the current rate of \$9.99 you won't find better value anywhere.

If you have enjoyed this free Report then Please visit our blog at [The Income Academy Blog](#) This is updated on an (almost) daily basis. There are some other free reports available along with some experiments. You might even find some interesting posts there!
